

LANDA®

Industrial Pressure Washers and Parts Washers
...Built Right to Do the Job Right

Since 1969

Accessories

To Enhance Your Power Washing Effectiveness

- Flat Surface Cleaner
- Telescoping Lances
- Rotary Nozzles
- Hose Reels

Legacy Revolution Rotary Nozzle

A rotating nozzle [A] combines the wider spray pattern of a 25° nozzle [B] with the deep cleaning of a 0° nozzle [C]

For extra-fast and deep cleaning

Landa's Legacy Revolution Rotary Nozzle cleans

faster and deeper than conventional high-pressure spray nozzles by combining the deep cleaning impact of a 0-degree nozzle with the broad spray pattern of a 25-degree nozzle. With cleaning action that is both deep and wide, wash time and labor costs can be slashed significantly.

Hose Reels

For tangle-free handling and protection

Hose reels take the muscle and pain out of fighting unyielding high-pressure hoses as well as keeps them safely stored away from traffic. There

are a wide variety of reels, including the popular 360° pivot reel. All come with mounting brackets for easily attaching to your Landa pressure washer.

Water Jet Flat Surface Cleaner

For fast, stripe-free cleaning of asphalt or concrete

The Water Jet is the premier surface cleaner on the market attaching easily to a hot or cold-water pressure washer to "mow" grime. With its infinitely variable rotary bar adjustment, the Water Jet can clean a wide variety of surfaces from concrete to asphalt.

The stainless steel spray bar, with two precision spray nozzles, spins at an astounding 2000 RPM. Its pneumatic tires and leading swivel caster make for easy maneuvering into corners and tight spaces.

The Water Jet attaches to a hot or cold water pressure washer and cleans flat surfaces fast using a water-propelled spray bar that spins at 2000 RPM

Telescoping Lances

For safe, scaffold-free cleaning of hard-to-reach places

Landa's popular telescoping lances and wands provide safe cleaning capability of up to 24 feet—long enough to reach gutters and eaves on a two-story building—without the need for a ladder or scaffolding. Models come in fiberglass or aluminum so they're lightweight and evenly balanced. Each is rated for up to 3500 PSI and water temperature of up to 200°F. Additional accessories include a shoulder strap and belt as well as a gutter-cleaning attachment.

Flex wand is ideal for cleaning gutters and eaves

Landa's telescoping lances offer a safe alternative to power washing with a ladder or scaffolding

Three lengths:

- 6 to 12 ft.
- 6 to 18 ft.
- 6 to 24 ft.

Industrial Pressure Washers and Parts Washers
...Built Right to Do the Job Right

Since 1969

Accessories

To Enhance Your Power Washing Effectiveness

- Mobile Cleaning
- Wet Sandblaster
- Sewer Cleaner
- Wheel Kits
- Hose Extensions
- Foam Nozzles

Drain Cleaner

For powerful sewer or pipe flushing

A jet spray nozzle, attached to the pressure washer and a special hose, creates a pulsating spray that pushes the hose down into the clogged drain or pipe. Some nozzles also rotate for additional agitation and even pipe surface cleaning. A covered, foot-controlled pedal allows for hands-free operation of this accessory.

Soap Applicator

For low-pressure application of detergent

This industrial chemical sprayer is ideal for applying detergent before

pressure washing. The pump (also sold separately, Part No. 100879) is protected by a wall-mounted cabinet and draws soap from a bulk tank. It has a trigger-action gun, adjustable nozzle and 100 feet of hose.

Mobile Cleaning Packages

For on-site washing operations

Landa has two trailer-mounted wash systems for on-site cleaning, a single-axle trailer with 200 gal. water tank and a double-axle model with a 330 gal. tank. These top-quality packages allow you to customize the trailer to your needs by mixing and matching trailer beds, pressure washers and a wide selection of options and accessories.

TR-6000 double-axle trailer shown with optional pressure washer, fuel and tool box, work lamp, chrome fenders and wheels

Industrial Wet Sandblaster

For dust-free stripping of paint from walls, barnacles from ships, etc.

For the extra-tough cleaning tasks, wet sandblasting is the dust-free solution. The Landa sandblaster attaches to a hot- or cold-water pressure washer and, using a venturi, mixes in sand or other abrasive media with the high-pressure spray of the power washer to create enough cleaning power to strip paint off concrete or barnacles from a ship's hull. The sandblasting nozzle is made of tungsten carbide for long life. A variety of safety features, including a face shield, come standard with the sandblaster.

Hose Extensions

For extending your reach when you need it

Add flexibility to your cleaning reach with extra lengths of hose including Landa's famous Tuff-Skin™ hose that has proven to be seven times more abrasive resistant than standard high-pressure hose yet is 20% more flexible. Many 2-wire and 1-wire hoses available.

Foam Nozzles

For high-density foam and longer detergent dwell time

Landa's Foam Cannon [A] or Compact Foamer [B] turn your detergent into a high-density, clinging suds for longer dwell time and increased chemical action.
